SUMMARY

SAP Certified BTP Developer at LTM (LTI Mindtree) with experience in building full-stack enterprise applications using CAP (Cloud Application Programming Model), SAP Fiori/UI5, and cloud-native services. Proficient in Node.js, TypeScript, Python, and RESTful API design. Skilled in developing scalable architectures, enterprise integrations, and secure deployments on SAP BTP. Experienced in integrating Generative AI capabilities using SAP AI Core, Joule, and external LLM services with backend systems. Strong background in designing OData APIs, CDS data models, and optimizing system performance. Proven ability to work in Agile environments, collaborate across teams, and deliver efficient, data-driven enterprise solutions.

SKILLS

- SAP Technologies	SAP BTP, SAP CAP (CAPM), CDS, OData V4, SAP HANA Cloud, SAP Fiori/UI5, Fiori Elements, SAP Launchpad, SAP AI Core, AI Launchpad
- Frontend Development	React, SAP UI5, HTML, CSS, Tailwind CSS
- Backend Development	Node.js, TypeScript, Python, Django, REST APIs, PostgreSQL, MongoDB
- AI / Machine Learning	Generative AI, LLM Integration, Vector Databases, Pinecone
- Soft Skills	Teamwork, Problem Solving, Critical Thinking, Leadership, Team Management, Communication, Public Speaking

WORK EXPERIENCE

Consultant - Package Implementation (SAP BTP) @ LTM September 2025 - Present

- Designed and developed full-stack enterprise applications on SAP BTP using **CAP (Node.js)**, CDS data models, OData V4 services, and SAP HANA Cloud.
- Built scalable and responsive SAP Fiori/UI5 applications leveraging Fiori Elements, annotations, and SAP Launchpad service.
- Developed AI agents and Joule skills, and implemented Generative AI (GenAI) POCs using **SAP AI Core** and external LLM APIs.
- Implemented secure service integrations using SAP BTP Destination & Connectivity services, and managed deployments via **Cloud Foundry**.
- Strong expertise in **SAP CAP** and cloud-native architecture for building scalable enterprise applications.

AI & Backend Developer Intern @ Baari Labs January 2025 - May 2025

- Built a **Django**-based document verification application using Pinecone vector DB, OpenAI, Gemini, and Tailwind, reducing document validation time by **10x**.
- Developed an **AI-powered chatbot** with a Node.js/Express/TypeScript backend and React frontend, optimizing document data retrieval.
- Implemented **web scraping solutions** using Selenium, BeautifulSoup, and MongoDB to automate data collection and enhance AI-driven insights.
- Expertise in **Python, Django, Node.js**, and **AI** model integration for **scalable, high-performance backend architectures**.

Content Design and Lead Intern @ HighScores.AI

January 2024 - September 2024

- Led a remote team of 10+ interns, creating and reviewing 100+ SAT/ACT assessments.

- Managed 10+ content projects in a non-technical environment using Agile methodology and Jira.

- Designed 50+ digital assets, including educational graphics and marketing materials.

- Enhanced skills in team leadership, project management, and graphic design.

EDUCATION

B.Tech in Artificial Intelligence And Machine Learning	MITS Gwalior
2021 - 2025	(CGPA: 7.68/10.0)
Class 12th ISC Board	Christ Church School ISC, Jabalpur
2020	(91.4%)
Class 10th ISC Board	Christ Church School ISC, Jabalpur
2018	(80.8%)

PROJECTS

Gadget Guru

rsxxiv/Gadget-Guru

Developed GadgetGuru, a full-stack AI-powered app using React, FastAPI, and TailwindCSS to provide real-time gadget recommendations and comparisons. Integrated Google Gemini Pro API to enable conversational AI and natural language responses with markdown support. Designed an interactive dashboard and chat UI with auto-scroll, loading states, and dynamic routing for /chat, /compare, and /insights. Achieved <200ms response rendering, 75%+ accurate intent routing, and 40% fewer API errors using input validation, async error handling, and optimized component state management.

Profiles REST-API

rsxxiv/profiles-rest-API

Designed and implemented RESTful APIs for user profile management, supporting 5+ endpoints for including authentication, profile creation, updates, and retrieval. Django REST Framework to achieve modularity and scalability. Ensured 90% test coverage for API reliability, optimized response times, and automated deployment workflows using Vagrant and Python scripting

PreSense-AI

rsxxiv/PreSense-AI

This system utilizes a webcam to recognize faces in real-time with a pre-trained CNN model for high accuracy. OpenCV for smooth detection, user-friendly visuals display live status and personal information which is all stored in a cloud database

MyMovieRecommender

rsxxiv/MyMovieRecommender

Leveraged content-based recommendation systems to design a movie recommendation engine. This system analyzes movie attributes (genre, director, actors) to suggest similar titles to users based on their preferences.

CERTIFICATIONS

SAP Certified Associate SAP Fiori Application Developer SAP	November 2025
SAP Certified Associate SAP Cloud Application Programming Model - SAP	December 2025
Generative AI with Large Language Models - DeepLearning.AI, Coursera	April-May 2025
